FunSlides Carpet Skates Used as Tools for Rehabilitation Professionals
Carpet Skates help people slide through physical therapy

For Immediate Release

(March. 10, 2008, Irwin, PA)- Simtec Co., creators of Fun Slides brand, announces that their FunSlides Carpet Skates are used by the rehabilitation community to aid those relearning to walk, stretch and glide while focusing on coordination, balance and motor skills. Originally created to get kids off the couch in any weather, Simtec Co. is thrilled that therapists are now using Carpet Skates for treatment.

“We have received wonderful feedback on FunSlides from therapists and pediatricians who consistently look for new ways to inspire and work with injured persons,” said Candace Holsing, Director of Sales and Marketing. “We plan to continue donating our products to special needs and rehabilitation programs.”

Carpet Skates are plastic sliders that attach under athletic shoes, providing the feeling of socks on a hardwood floor but with more control. They have a hook and loop closure for a secure hold and fit up to a size 15 shoe. Carpet Skates are available for \$19.99 at www.funslides.com as well as retailers across the nation.

###

About Simtec Co

A family run company headquartered in Irwin, PA. They first hit the market with [EZ Moves® Furniture Slides™](#). Founded in 1993 when a father and son team of carpet installers knew there had to be an easier way to move furniture. EZ Moves inspired Carpet Skates and the development of a line of Fun Slides brand carpet sports products.
